

ZAYD TAWA

Zayd is a porter in the Estates and Facilities department at Glenfield Hospital.

“I assist patients to where they need to go in the hospital.”

“ I move things and transport special hospital equipment such as medication from the in-house pharmacy and patient x-ray information.”

He also works in the post room where he sorts out mail and parcels.

Waking up on time to reach the workplace is a challenge for Zayd.

At the end of a busy day, he feels tired.

“My end goal after Project Search is to find employment. I would like to explore the Robotics department at the hospital.”

“I like talking to and socialising with patients when I am directing or taking them to certain places in the hospital by walking or using their wheelchair.”

“I like to meet new people.”
