

DEVANSHI

T LEVEL DIGITAL BUSINESS SERVICES

***STUDENT
SPOTLIGHT***

“I chose this Pathway to IT because of the Industry Placement. This was very important to me as I wanted to do an Apprenticeship rather than go to university as I was worried about the costs of studying.”

Devanshi moved to Leicester from India in 2020 and completed her GCSE Maths and English qualifications at Gateway College, to then successfully progress onto her T Level course.

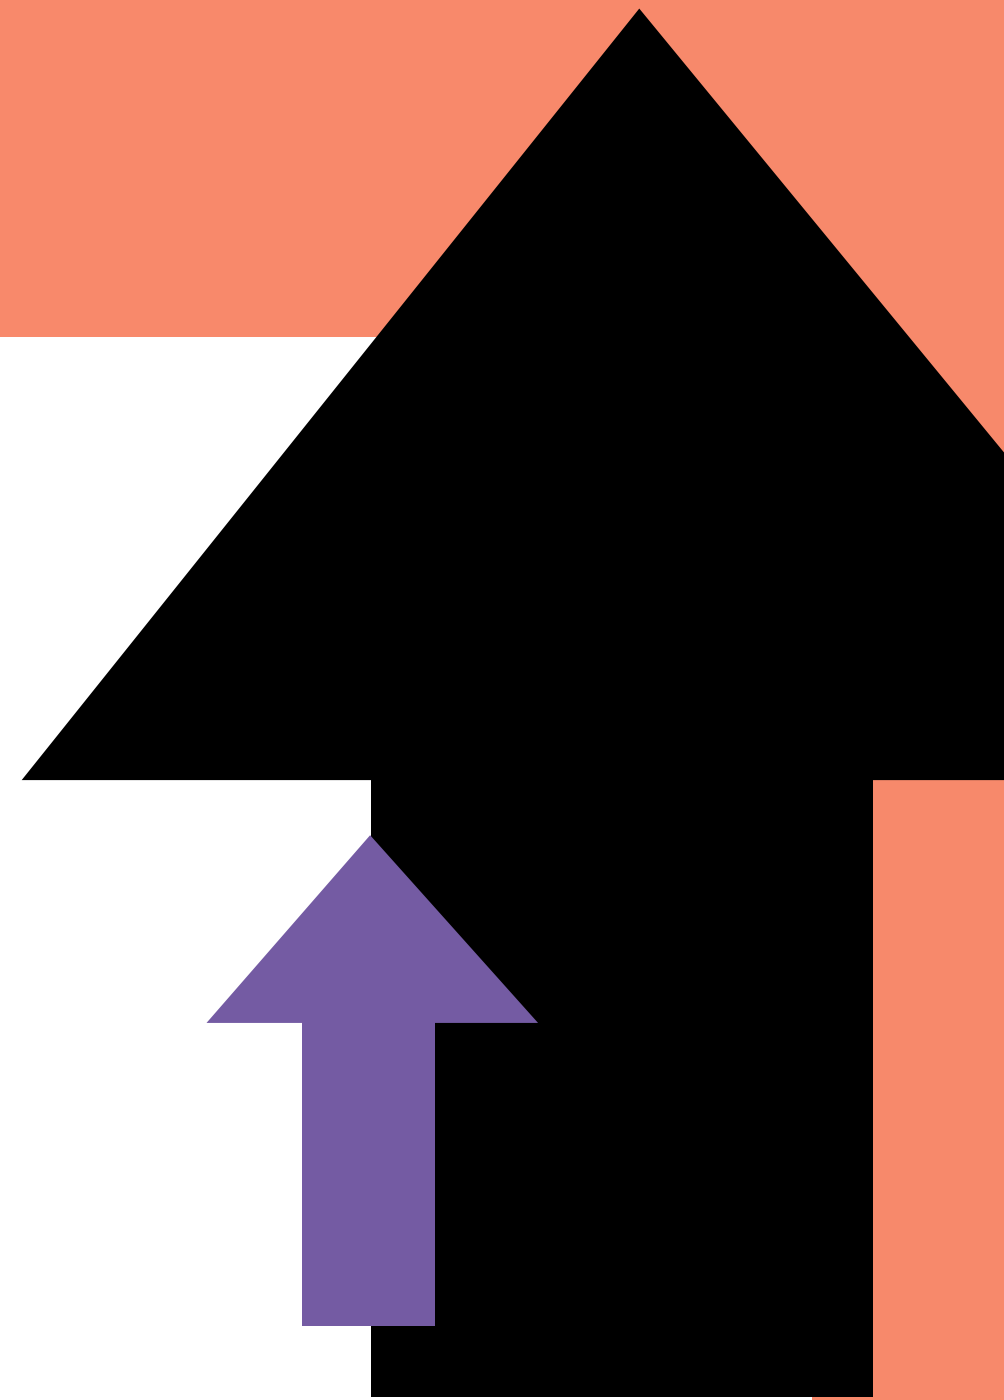

“On my placement I was analysing data and looking at trends and patterns in curriculum achievement and then making recommendations based on this to improve performance.”

Next steps:

Devanshi undertook her course industry placement, working as a Junior Data Associate in the education sector.

Following this, she has gained a Higher Degree Apprenticeship combining employment with degree-level study

“The course was challenging but I have enjoyed it very much!”

“The teachers on my course were so supportive and I received lots of help with my UCAS application and finding a Higher Degree Apprenticeship from the College Careers team.”

“I would recommend this course if you like working with other people, have a clear aim of wanting to go into the workplace and to continue with further training.”
