## ***T LEVEL DIGITAL BUSINESS SERVICES***

***STUDENT  
SPOTLIGHT***

**“I chose to study this Pathway to IT because it aligned with my values and interests. I liked the combination of the practical elements of the T Level, the industry placement and theory. I knew I wanted to go to university and that it would give me enough UCAS points to achieve my goal.”**

**“I would recommend the course for students who know they want to go into industry afterwards. You must be a motivated and independent learner. To have resilience to keep going when the course gets challenging. Stay focussed and manage your time well.**

**Next steps:  
Muumbe is doing a  
Higher Degree  
Apprenticeship in  
Manchester with  
Price Waterhouse Cooper  
(PWC) as a Software  
Engineer Over three years,  
she will be studying a  
combination of  
employment and  
degree-level study**

**“I had a lot of help with my UCAS application and application for Higher Apprenticeships. The careers team at Gateway College and my teachers were excellent.”**

**“Make the most of your experience as a student, don’t just do your courses, look for other opportunities to increase your employability skills for the future.”**
